Read these directions carefully before starting the examination.

It is extremely important that you fill in the answer sheet exactly as indicated, otherwise your test may not be processed; ALL entries are to be made on SIDE 1 of the answer sheet. Use a #2 pencil (or softer); fill in the circles completely and firmly. Erasures must be complete. Use only the following categories:

| NAME: | Print your name starting at the first space, LAST NAME first, then a space, followed by your FIRST NAME, then another space, followed by your MIDDLE INITIAL. Fill in the correct circles below your printed name corresponding to the letters of your name; for the spaces, fill in the top blank circle. |
| STUDENT NUMBER: | This is very important. Put in your 8 digit student ID number (do not use the 9 at the beginning of your number) beginning in column A and continuing through column H, column I will be blank, (do NOT use column J at this time) under IDENTIFICATION NUMBER; be sure to fill in the correct circles (a common error to be avoided is mistaking "0" for "1"). |
| TEST FORM: | Fill in the "4" blank in the J column under IDENTIFICATION NUMBER (to indicate Hour Examination IV). |
| SPECIAL CODES: | Use for course and section number; in positions K-P write in one of the following: |
| Dr. H. Ades | 105-001, 105-002 |
| Ms. E. Ferguson | 105-401 |
| SIGNATURE: | You must sign the examination answer sheet (bubble sheet) on the line directly above your printed name. Use your legal signature. |

Answering Questions:

Starting with answer "1" on SIDE 1, fill in the circle indicating the one best answer for each of the 60 questions in this examination. Your score is the sum of the appropriate credit for each response. Soon after the examination is finished, an examination key will be posted on Blackboard.

Grading and Reporting:

The examination scores will be posted in Blackboard as soon as possible after the examination. If an error has been made in scoring your answers, tell your instructor within 48 hours of the posting of your score.

Be sure that your test has 60 questions, a periodic table, and two sheets of scratch paper. You may not use your own scratch paper during this examination. Cell phones and pagers are to be turned off and out of sight during the exams. All exam paper, scratch paper, and scantrons must be handed in at the end of the exam. You may not take any exam materials away from the exam room.
